Author Index—Volume 38 (2001)

(The issue number is given in front of page numbers)

Abia, L.M., J.C. López-Marcos and J. Martínez, The Euler method in the numerical integration of reaction–diffusion problems with blow-up (3) 287–313

Ben-yu, G., Gegenbauer approximation and its applications to differential equations with rough asymptotic behaviors at infinity (4) 403–425

Björck, M., see **Nordström, J.** (3) 237–255

Blasco, J. and R. Codina, Space and time error estimates for a first order, pressure stabilized finite element method for the incompressible Navier–Stokes equations (4) 475–497

Brown, B.M., P.K. Jimack and M.D. Mihajlović, An efficient direct solver for a class of mixed finite element problems (1–2) 1– 20

Bujanda, B. and J.C. Jorge, Stability results for fractional step discretizations of time dependent coefficient evolutionary problems (1–2) 69– 86

Burrage, K., see **Tian, T.** (1–2) 167–185

Chen, B. and J.H. Schenker, Molecular dynamic simulations of gases using a split-Hamiltonian method (1–2) 21– 48

Codina, R., see **Blasco, J.** (4) 475–497

Cong, N.H., Explicit pseudo two-step RKN methods with stepsize control (1–2) 135–144

El-Hawary, H.M. and S.M. Mahmoud, On some 4-point spline collocation methods for solving second-order initial value problems (1–2) 223–236

Gu, G.-D., Some conditions for existence and stability of relaxed incomplete LU factorizations (1–2) 105–121

Jimack, P.K., see **Brown, B.M.** (1–2) 1– 20

Jorge, J.C., see **Bujanda, B.** (1–2) 69– 86

Kobayashi, S., see **Tang, D.** (1–2) 49– 68

Koren, B., see **Lastdrager, B.** (4) 377–401

Ku, D.N., see **Tang, D.** (1–2) 49– 68

Kweon, J.R., A mixed finite element method for a compressible Stokes problem with high Reynolds number (1–2) 87–103

Lastdrager, B., B. Koren and J. Verwer, The sparse-grid combination technique applied to time-dependent advection problems (4) 377–401

Lie, I., Well-posed transparent boundary conditions for the shallow water equations (4) 445–474

Lin, T. and D.L. Russell, A superconvergent method for approximating the bending moment of elastic beams with hysteresis damping (1–2) 145–165

Liu, K.M., see **Sun, W.** (3) 361–376

Liu, W. and T. Tang, Error analysis for a Galerkin-spectral method with coordinate transformation for solving singularly perturbed problems (3) 315–345

López-Marcos, J.C., see **Abia, L.M.** (3) 287–313

Luce, R. and S. Perez, A finite volume scheme for an elliptic equation with heterogeneous coefficients. Application to a homogenization problem (4) 427–444

Mahmoud, S.M., see **El-Hawary, H.M.** (1–2) 223–236
Martínez, J., see **Abia, L.M.** (3) 287–313
Mihajlović, M.D., see **Brown, B.M.** (1–2) 1– 20

Nordström, J. and M. Björck, Finite volume approximations and strict stability for hyperbolic problems (3) 237–255

Perez, S., see **Luce, R.** (4) 427–444

Russell, D.L., see **Lin, T.** (1–2) 145–165
Ryaben'kii, V.S., S.V. Tsynkov and V.I. Turchaninov, Long-time numerical computation of wave-type solutions driven by moving sources (1–2) 187–222

Schenker, J.H., see **Chen, B.** (1–2) 21– 48
Sun, W. and K.M. Liu, Iterative algorithms for nonlinear ordinary differential eigenvalue problems (3) 361–376

Tang, D., C. Yang, S. Kobayashi and D.N. Ku, Generalized finite difference method for 3-D viscous flow in stenotic tubes with large wall deformation and collapse (1–2) 49– 68
Tang, H.-Z., Nonlinear stability of the relaxing schemes for scalar conservation laws (3) 347–359
Tang, T., see **Liu, W.** (3) 315–345
Tian, T. and K. Burrage, Implicit Taylor methods for stiff stochastic differential equations (1–2) 167–185
Tsitouras, Ch., Optimized explicit Runge–Kutta pair of orders 9(8) (1–2) 123–134
Tsynkov, S.V., see **Ryaben'kii, V.S.** (1–2) 187–222
Turchaninov, V.I., see **Ryaben'kii, V.S.** (1–2) 187–222

van der Heul, D.R., C. Vuik and P. Wesseling, Stability analysis of segregated solution methods for compressible flow (3) 257–274
Verwer, J., see **Lastdrager, B.** (4) 377–401
Vuik, C., see **van der Heul, D.R.** (3) 257–274

Wesseling, P., see **van der Heul, D.R.** (3) 257–274
Winkler, J.R., Condition numbers of a nearly singular simple root of a polynomial (3) 275–285

Yang, C., see **Tang, D.** (1–2) 49– 68
